### florida keys blue

BY BENJAMIN MOORE

"Cabinets are one thing you don't change every few years, so you have to pick a color you'll love for the long run. These homeowners were just as crazy about this vivid teal blue as I was! It makes the kitchen in their 1910 bungalow look bigger and brighter, and it helps the vintage-y cabinet details pop, too."

### coral reef

BY SHERWIN-WILLIAMS

"Some pinks look a little too Pepto-Bismol, but this one's coral undertone makes it modern—perfect for jazzing up the homeowners' old dresser for their daughter's bedroom. It's a great color for a soon-to-be tween—preppy, young, but not at all babyish."
